MEMORANDUM

TO: Members of Council

THROUGH: Vincenti Pedro, Sr., Governor *V. Lee*

FR: Ron J. Solimon, Legal Assistant *Ron*

RE: Reclamation Discussions

DA: February 6, 1984

Confidential Claim Retracted

Authorized by: *SC*

Date: *6/25/13*

Attached hereto please find a copy of "Alternative E - Laguna Proposal" which has evolved from past Council discussions on the Environmental Impact Statement (EIS). This document comprises our position with the exception of the one engineering standard that I have identified with an asterisk (Note: It hasn't been presented to Council for their adoption). This standard will be presented to you tomorrow by Allen Ries who is a mining engineer employed by the Council of Energy Resource Tribes (CERT) on a consulting contract.

I have developed an agenda with Mike Pool, EIS Task Force Leader, which will include the following subject areas:

- HYDROLOGY
- MINE-SITE
- BLAST DAMAGE
- MINERAL RESOURCES
- REVEGETATION METHODS
- SURFACE FACILITIES AND STRUCTURES
- UNDERGROUND MODIFICATIONS
- SITE STABILITY AND DRAINAGE
- MONITORING
- SECURITY AND COMPLIANCE
- RECLAMATION COMPLETION
- RECLAMATION COSTS

BLM and BIA presenters and representatives will be in attendance along with CERT employees who have worked on the reclamation project. I'm looking forward to a good discussion.
